

## **REMARKS**

### **Formal Matters**

Claims 1, 3-12, 14-24, 26-30, 32-38, 40-51 are the claims currently pending in the Application. Claims 1, 12, 21, 29, 37, 47, and 51 are amended herein. Claims 2, 13, 25, 31 and 39 are canceled. Applicant appreciates that the Examiner finds claims 2, 4, 6, 8, 13, 15, 17, 25, 30, 31, 33, 38, 39, 41 and 43 allowable, but are objected to for being dependent from rejected base claims.

### **Rejection of Claims 1, 5, 12, 16, 21, 29, 37, 40, 47 and 51 Under 35 U.S.C. §103**

Claims 1, 5, 12, 16, 21, 29, 37, 40, 47 and 51 are rejected under 35 U.S.C. §103 as being unpatentable over Timothy Bickmore et al., "Web Page Filtering and Re-Authoring for Mobile Users", The Computer Journal, Volume 42, No. 6, 1999 (hereinafter "Bickmore") in view of Shindoa Mayumi, Japanese Patent Publication 08-202655 (hereinafter "Mayumi"). This rejection should be withdrawn based on the comments and remarks herein.

The Examiner has stated that claims 2, 13, 25, 31 and 39 are allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Accordingly, claim 2 is canceled herein, and the features of claim 2 are incorporated into independent claim 1. Similarly, independent claims 12, 21, 29, and 37 are amended to add the limitations of allowable claims 13, 25, 31, and 39, respectively. Also, independent claims 47 and 51 are amended to include the limitation of "determining the font *which corresponds to* a language selected in the wireless client" as

this is the limitation that the Examiner found allowable in at least claims 2, 13, 31 and 39. Thus, independent claims 1, 12, 21, 29, 37, 47 and 51 have been rewritten to incorporate features and limitations from the allowable claims into the base claim; applicant notes that there are no intervening claims. Applicant respectfully states that these claims are now allowable.

Claim 5 depends from independent claim 1, claim 16 depends from independent claim 12, and claim 40 depends from independent claim 37. Therefore, claims 5, 16 and 40 incorporate novel and nonobvious features of their respective independent base claims and are patentably distinguishable over the prior art for at least the reasons that their respective base claims are patentably distinguishable over the prior art. Accordingly, this rejection should now be withdrawn.

#### **Rejection of Claims 3, 14 and 22**

Claims 3, 14 and 22 are rejected under 35 U.S.C. §103 as obvious from over Bickmore, and being well known in the art. This rejection should be withdrawn based on the comments and remarks herein.

The Examiner states that it is well known in the art to have an authenticating unit which performs authentication for connecting the wireless client to the gateway server as claimed in these claims. However, even if it were well known in the art to perform authentication in this manner, this does not remedy the deficiencies of Bickmore as they relate to Applicant's invention as admitted by the Examiner and as discussed above. Independent claims 1, 12 and 21, from which claims 3, 14 and 22 depend, include at least

the features of claims 2, 13, and 25, respectively, which features the Examiner states are allowable. Thus, Therefore, claims 3, 14 and 22 incorporate novel and nonobvious features of their respective independent base claims and are patentably distinguishable over the prior art for at least the reasons that their respective base claims are patentably distinguishable over the prior art. Accordingly, this rejection should now be withdrawn.

**Rejection of Claims 9-11, 18-20, 26-29, 34-36, 44-46 and 48-50 Under 35 U.S.C. §103**

Claims 9-11, 18-20, 26-29, 34-36, 44-46 and 48-50 are rejected under 35 U.S.C. §103 as being obvious from Bickmore and the Official Notice taken by the Examiner. This rejection should be withdrawn based on the comments and remarks herein.

The Official Notice does not remedy the deficiencies of Bickmore, admitted by the Examiner and as discussed above, as they relate to Applicant's invention as claimed in independent claims 1, 12, 21, 29, 37, 37 and 47. Claims 9-11, 18-20, 26-29, 34-36, 44-46 and 48-50 depend from independent claims 1, 12, 21, 29, 37, 37 and 47, respectively, and thus incorporate novel and nonobvious features thereof. Accordingly, claims 9-11, 18-20, 26-29, 34-36, 44-46 and 48-50 are patentably distinguishable over the prior art for at least the reasons that their respective independent base claims are patentably distinguishable over the prior art. Therefore, this rejection should now be withdrawn.

**Rejection of claims 7, 23, 24, 32 and 42**

Claims 7, 23, 24, 32 and 42 are rejected under 35 U.S.C. §103 being unpatentable over Bickmore in view of Mayumi and further in view of Simon, U.S. Patent No. 6,065,008. This rejection should be withdrawn based on the comments and remarks herein.

Simon does not remedy the deficiencies of Bickmore combined with Mayuumi as they relate to applicant's invention as recited in independent claims 1, 21, 29 and 37. Therefore, since claims 7, 23, 24, 32 and 42 depend from these independent base claims, respectively, claims 7, 23, 24, 32 and 42 incorporate novel and nonobvious features thereof and are patentably distinguishable over the prior art for at least the reasons that their respective independent base claims are patentably distinguishable over the prior art. Therefore, this rejection should now be withdrawn.

**Conclusion**

For at least the reasons set forth in the foregoing discussion, Applicant believes that the Application is now allowable and respectfully requests that the Examiner reconsider the rejections and allow the Application. Should the Examiner have any questions regarding this Amendment, or regarding the Application generally, the Examiner is invited to telephone the undersigned attorney.

Respectfully submitted,

Katherine R. Vieyra
